

Symposium Session of ESOT 2019 Congress

Transplant success

Whose responsibility is it?

Monday 16 September 2019

18:05–19:35

Congress Hall A1, Bella Center Copenhagen
Copenhagen, Denmark

Chair:

Prof Dr Stefan Schneeberger

Innsbruck Medical University
Austria

Dear Colleague

I am delighted to invite you to the Astellas-funded and developed symposium '**Transplant success: Whose responsibility is it?**'

The symposium will focus on the responsibility of the transplant community to increase organ availability, and examine how post-transplant success is driven by the partnership between the patient, physician and medication.

The faculty will discuss ways in which the needs/wants of patients, their relationships with the physician, and their role in transplant care are evolving. Through presenting on the experiences and perceptions of both the physician and the patient we will explore how the clinical community can work in partnership with today's patients and their medication to continue the improvements being made in transplant management.

I look forward to seeing you at what will be an informative and stimulating symposium.

Prof Dr Stefan Schneeberger, Symposium Chair
Innsbruck Medical University, Austria

AGENDA

- 18:05 Welcome and introduction from the Chair**
Prof Dr Stefan Schneeberger,
Innsbruck Medical University, Austria
- 18:12 Who/what is responsible for making more organs available?**
Prof Lluís Guirado, Fundació Puigvert Hospital,
Barcelona, Spain
- 18:37 Who/what is responsible for post-transplant success: The patient?**
Sari Högström, European Kidney Patients'
Federation and Finnish Kidney and Liver Association
- 18:57 Who/what is responsible for post-transplant success: The physician?**
Prof Wolf Bechstein, Frankfurt University Hospital
and Clinics, Germany
- 19:17 Who/what is responsible for post-transplant success: The medication?**
Prof Teun van Gelder, Erasmus Medical Center,
Rotterdam, The Netherlands
- 19:32 Summary: Who/what is responsible for post-transplant success?**
Prof Dr Stefan Schneeberger,
Innsbruck Medical University, Austria
- 19:35 Meeting close**
